SATURN 5
CLEAR PLASTIC FINS

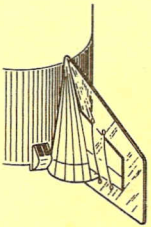

* ***INCREASED STABILITY!***
* ***NO TOOLS REQUIRED!***
* ***GIVES SLOW SPINNING EFFECT!***
* ***EASILY REMOVED FOR DISPLA Y!***

Centuri

These clear plastic snap-on fins add that extra margin of stability for all your SATURN V flights. Absolutely necessary when flying the SATURN V with "E" and "F" engines.

Simply attach the clear plastic fins by passing the regular fins through the clear plastic fin slots as shown. By attaching all fins with the bends going the same way, the fins will have a slight "cork-screw" effect. This will give a majestic spin at liftoff!
