Centuri

Long Tom

ASSEMBLY INSTRUCTIONS

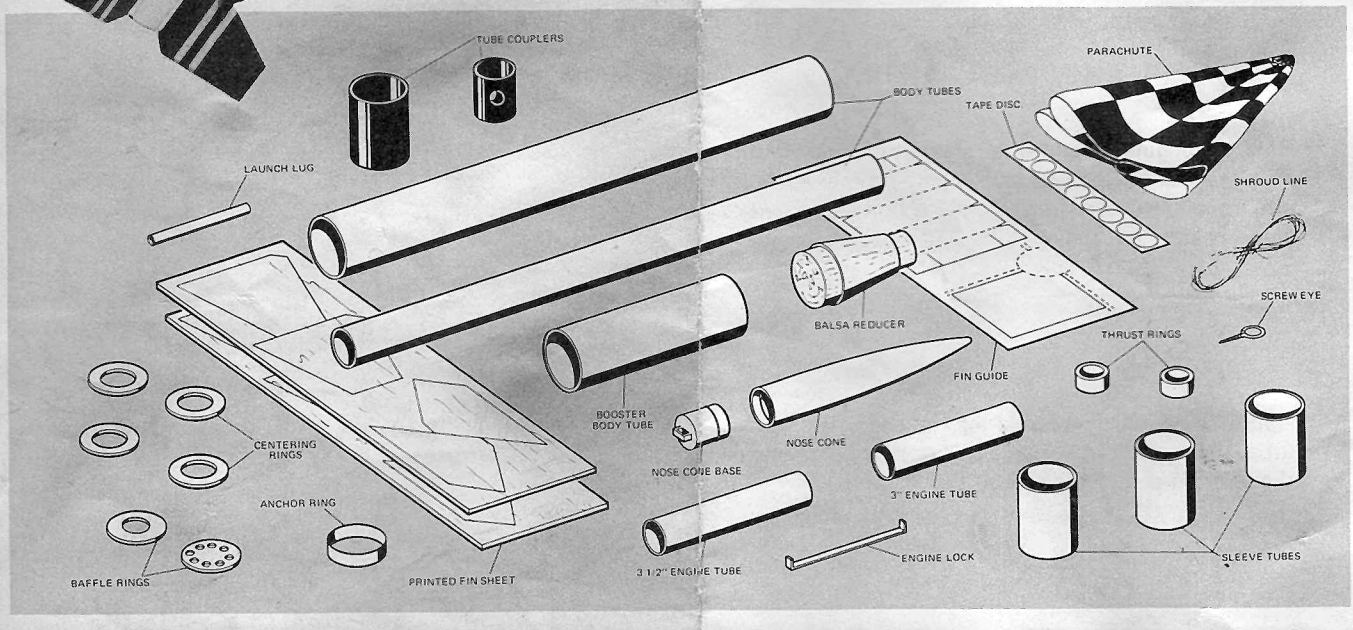
FOLLOW DIRECTIONS CAREFULLY!

CATALOG NO. KC-4

Standing an impressive 35½" tall, the Long Tom is sure to be high on the local popularity list. This attractive two stage kit will be perfect for demonstration flying. Featuring Centuri's new *"pass port" staging system, the Long Tom is a sure fire performer every time.

*Patent Pending

TOOLS: In addition to the parts supplied, you will need the following materials to assemble and finish this kit. DO NOT use model airplane glue for building flying model rockets.



NOTE: Additional items required to fly the LONG TOM are: engines, launching platform, firing panel, and battery.
